

## GOVERNING RULES AND REGULATIONS FOR CERTIFICATION

### CONTRABAND CANINES

The purpose of this test is to evaluate the ability of a canine to detect and find cellphones, tobacco and other contraband commonly found in a jail or corrections environment. All certifications are good through December 31<sup>st</sup> of the following year. (i.e.: if you certify on April 1<sup>st</sup>, 2022, your certification will not expire until December 31<sup>st</sup>, 2023) Rules found in the General Guidelines for Detection Certification will apply unless specifically stated in this section.

This test is designed to be done if possible, within the confines of the actual work area. Other appropriate facilities can be used for testing at the discretion of the Chief Judge. **Cellphone/Electronics testing is a separate test from the Tobacco/Opioid Medication testing. The two cannot be combined.**

**Judges will not carry cellphones, electronic devices or any tobacco products in the testing venues.**

#### 1. TESTING:

A. This test will consist of two venues: cells and general access areas. There shall be two hides in each of the two venues.

The following substances/amounts may be used: (based on needs of the region or department)

FOR **CELLPHONE/ELECTRONIC DEVICE** DETECTION DOGS: Testing may be conducted using only cellphones, cellphones and sim cards, or what is determined to be acceptable by the Chief Judge based on the odors below and the training of the participants.

Cellphone batteries - 1 up to 5 batteries in one hide

Thumb drive type storage device

Cellphone\* - Cellphone alone

Cellphone/electronic device charger used within the last 24 hours. Cellphone\* - Cellphone in a case with charger

Sim Cards - (in cells only) no less than 5 cards in one hide

- Sim cards are to be used in Cell searches only. The 2<sup>nd</sup> hide in the cell search may be one of the other listed items. The Cellphones and Batteries used in this test must be fully (recently) charged.

FOR **TOBACCO/OPIOID MEDICATION** DETECTION DOGS: Testing may be conducted using only tobacco products (various ones from this list should be tested) or opioid medications only, as determined by the Chief Judges based on the training of the participants.

Loose tobacco - in a tin, baggie, etc. No less than 5 grams and no more than 3 oz.

Chewing tobacco – no less than one tin. No pouches.

One pack of cigarettes or 1 cigar

One cigarette- (in cells only)

Odor determined by and approved by the local region, used by

facilities as an opioid withdrawal medication, such as Buprenorphine or Suboxone.

- A single cigarette can only be used in Cell searches only. The 2<sup>nd</sup> hide in the cell search may be one of the other listed items.
- Amounts for the Opioid medication - For sublingual films (strips) - no less than three 8mg/2mg films will be used. (Buprenorphine / naloxone combined) Pill form – minimum of 12 mg and a max of 32 mg. (Buprenorphine/naloxone combo), typically called suboxone.

B. Care should be taken to ensure that the dog cannot retrieve or come in physical contact with the hidden substance or item.

C. The items or substances should be in place 30 minutes before the first search.

## 2. SCORING:

A. Maximum total point score of 200 is possible. Certification (passing) is 140 points, which is 70%. Dog must find three of the four hides to certify. See score sheets for areas of evaluation.

---

## CELL OR HOUSING SEARCH PHASE

A. Five (5) cells will be searched. These are cells that house no more than 4 occupants. The cells should contain items typically found in occupied cells. (i.e. bed, desk, etc.) Testing should be done with NO inmates or occupants inside the cells.

1. Other appropriate and similar rooms can be used for this testing in lieu of using actual facility cells.

B. The order of searching will be determined by the Chief Judge.

C. Two hides will be placed in two of the five cells. No two hides will be in one cell. See Testing A. above for details on the amounts and substance. One of the two hides will be either the single cigarette (if testing for tobacco) or the sim cards. (Sim cards are optional if the k9 is not trained on sim cards. Option would be a single phone charger, thumb drive or small battery)

D. There will be a 12-minute time limit, with a warning at the 10-minute mark.

## GENERAL AREAS (other than cells) INDOOR or OUTDOOR

A. This phase will consist of the K9 searching three (3) areas. Each room will be a minimum of 200 square feet and should be a room that would be consistent with areas where prisoners would be allowed. Examples would include dayrooms, exercise rooms, visitation areas, kitchens, etc. There will be a time limit of one and one half (1.5) minutes for every 100 square feet. Large rooms can (optional) be sectioned off with a makeshift or temporary barrier to reduce it to the 200 square foot minimum. The unused part of this room cannot be used as one of the three required searchable rooms. (i.e. A large room can be divided off to create a 200 ft search area, but the rest of the room cannot be used for the trial) If an outside yard(s) is used, it should still be approximately 200 square feet, but should not be just a blank area. (it should contain weight equipment, tables, chairs, etc. – Not an empty area)

1. Other appropriate and similar rooms can be used for this testing in lieu of testing on the prison/jail grounds.

B. The rooms or area must be furnished.

- C. There will be two hides within the three areas.
- D. There will be a two (2) minute warning given before the expiration of time.
- C. The handler can use the allotted time to search the areas at their discretion.

**Chief Judges are responsible for the accuracy and completeness of the paperwork.** Upload or E-mail completed trial paperwork to include: (within 30 days of the trial)

- Original Master score sheet
- Judges and Scorekeepers list with events judged
- The high-low sheets showing the scores of all judges.
